

POSITION DESCRIPTION

Matlab Developer, 4-Month Contract

OUR OBJECTIVE

To hire a developer for a contract position from Sep -Dec 2017 to work with the Quantitative R & D team.

THE FIRM

Breton Hill Capital Ltd. is a specialist in quantitative investing. We manage hedge funds, mutual funds, ETFs and private client accounts. Our investment strategies focus on finding value, identifying trends, and preserving capital. The firm was founded in 2011 and currently has CAD \$2.4 billion in assets under management.

THE POSITION

The **Matlab Developer** will work with our R & D investment professionals and Chief Financial Officer. The successful candidate will be responsible for developing software tools, primarily using MATLAB, to support daily processes, risk reporting and investment analytics. The position is a contract position ending Dec 31, 2017.

REQUIREMENTS

- Minimum 1-3 years of programming experience
- Proficiency in MATLAB, including object oriented programming
- Excellent analytical, communication and interpersonal skills
- A quantitative undergraduate degree (e.g. Math, Engineering, Computer Science)
- An advanced degree in one of these fields would be an asset
- Attention to detail in a fast-paced, deadline-sensitive environment
- Professional conduct, consistently guided by integrity, partnership and high performance
- Exceptional candidates with or without financial markets experience are encouraged to apply

Kindly submit your **resume** to and **sample matlab code** to information@bretonhillcapital.com.
